3101 Imperial Drive
Gastonia NC 28054

Dear Charlie:

This is a quick note. Will look into 2050 and QL. Enclosed please find information on Metacomco's QL PASCAL which is a great program. Temporarily out but have it on order.

We have a terminal program in stock but are waiting to test it on the American QL; will keep you posted. No plans yet for a BBS from us using the QL but other people are talking about it so I will keep you informed.

I recommend Sinclair User and Electronices & Computing as two other British magazines we carry which have QL articles. Buy any 3 magazines together and they are only 10.50 shipping included. QLRef is excellent program for finding information on QL programs, reviews, etc. Only $ 9.95.

All for now. Thanks for your support.

Best Regards

Rob Curry
